

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (original): A method of accessing information on a computer network on a communication device, the device being capable of communicating with a first communications network and receiving a signal from a second communications network, the method comprising:

receiving, via the second network, unsolicited information from the computer network, wherein the information contains an identifier identifying further information on the computer network;

requesting, via the first network, further information from the computer network, wherein the further information is based on the received identifier; and

receiving the further information via one of the first or second networks.

Claim 2 (original): The method of claim 1, wherein the second communications network is a broadcast network, and wherein the step of receiving via the second network is adapted for receiving via the broadcast network.

| Claim 3 (currently amended): The method of claim 1-~~or-2~~, wherein the first communications network is a telecommunications network, and wherein the step of receiving the further information is adapted for receiving the further information via the telecommunications network.

| Claim 4 (currently amended): The method of claim 1-~~or-2~~, wherein the step of receiving the further information is adapted for receiving the further information via the broadcast network.

| Claim 5 (currently amended): The method of claim 1-~~or-2~~, wherein the unsolicited information contains a content identifier, further comprising storing, on the device, a list of content identifiers of interest.

Claim 6 (original): The method of claim 5, further comprising filtering the received unsolicited information to remove any information not having a content identifier in the list of content identifiers.

Claim 7 (currently amended): The method of claim 1-~~or 2~~, wherein the second communication network is a digital video broadcast terrestrial (DVB-T) network, and wherein the steps of receiving via the second network are adapted for receiving via the DVB-T network.

Claim 8 (currently amended): The method of claim 1-~~or 2~~, wherein the first communication network is a cellular network, and wherein the step of receiving via the further information is adapted to receive via the cellular network.

Claim 9 (previously presented): A communication device for accessing information on a computer network, the device capable of communicating with a first communications network and receiving a signal from a second communications network, the device comprising:

 a receiver for receiving, via the second network, unsolicited information from the computer network, wherein the information contains an identifier identifying further information on the computer network; and

 a transceiver for requesting, via the first network, further information from the computer network, wherein the further information is based on the received identifier.

Claim 10 (previously presented): The device of claim 9, wherein the transceiver is adapted to receive the further information via the first network.

Claim 11 (original): The device of claim 9, wherein the receiver is adapted to receive the further information via the second network.

Claim 12 (currently amended): The device of claim 9-~~10 or 11~~, wherein the second communications network is a broadcast network, and wherein the receiver is adapted to receive the unsolicited information via the broadcast network.

Claim 13 (currently amended): The device of claim 9, ~~10, or 11~~, wherein the first communication network is a telecommunications network, and wherein the transceiver is adapted for use with the telecommunications network.

Claim 14 (currently amended): The device of claim 9, ~~10, or 11~~, wherein the unsolicited information contains a content identifier, and further comprising a memory for storing, on the device, a list of content identifiers of interest.

Claim 15 (original): The device of claim 14, further comprising a filter for filtering the received unsolicited information to remove any information not having a content identifier in the list of content identifiers.

Claim 16 (currently amended): The device of claim 9, ~~10, or 11~~, wherein the second communication network is a digital video broadcast terrestrial (DVB-T) network, and wherein the receiver is adapted to receive via the DVB-T network.

Claim 17 (currently amended): The device of claim 9, ~~10, or 11~~, wherein the first communication network is a cellular network, and wherein the transceiver is adapted for use with the cellular network.

Claim 18 (currently amended): The device of claim 9, ~~10, or 11~~, wherein the communication device is a portable communication device.

Claim 19 (currently amended): A system for accessing information on a computer network using a device as claimed claim 9, ~~10, or 11~~.

Claim 20 (currently amended): The system of claim 9, ~~10, or 11~~, further comprising a database of user profiles for storing a list of information categories determined to be of interest to the users.

Claim 21 (original): The system of claim 20, further comprising a broadcast transmitter for transmitting information from the computer network to users determined to be interested in the information.

Claim 22 (previously presented): A method of distributing information using the system of claim 19.

Claim 23 (previously presented): A method of distributing information for use with the device of claim 9.

Claims 24-26 (canceled)

Claim 27 (new): The method of claim 2, wherein the first communications network is a telecommunications network, and wherein the step of receiving the further information is adapted for receiving the further information via the telecommunications network.

Claim 28 (new): The method of claim 2, wherein the step of receiving the further information is adapted for receiving the further information via the broadcast network.

Claim 29 (new): The method of claim 2, wherein the unsolicited information contains a content identifier, further comprising storing, on the device, a list of content identifiers of interest.

Claim 30 (new): The method of claim 2, wherein the second communication network is a digital video broadcast terrestrial (DVB-T) network, and wherein the steps of receiving via the second network are adapted for receiving via the DVB-T network.

Claim 31 (new): The method of claim 2, wherein the first communication network is a cellular network, and wherein the step of receiving via the further information is adapted to receive via the cellular network.

Claim 32 (new): The device of claim 10, wherein the second communications network is a broadcast network, and wherein the receiver is adapted to receive the unsolicited information via the broadcast network.

Claim 33 (new): The device of claim 11, wherein the second communications network is a broadcast network, and wherein the receiver is adapted to receive the unsolicited information via the broadcast network.

Claim 34 (new): The device of claim 10, wherein the first communication network is a telecommunications network, and wherein the transceiver is adapted for use with the telecommunications network.

Claim 35 (new): The device of claim 11, wherein the first communication network is a telecommunications network, and wherein the transceiver is adapted for use with the telecommunications network.

Claim 36 (new): The device of claim 10, wherein the unsolicited information contains a content identifier, and further comprising a memory for storing, on the device, a list of content identifiers of interest.

Claim 37 (new): The device of claim 11, wherein the unsolicited information contains a content identifier, and further comprising a memory for storing, on the device, a list of content identifiers of interest.

Claim 38 (new): The device of claim 10, wherein the second communication network is a digital video broadcast terrestrial (DVB-T) network, and wherein the receiver is adapted to receive via the DVB-T network.

Claim 39 (new): The device of claim 11, wherein the second communication network is a digital video broadcast terrestrial (DVB-T) network, and wherein the receiver is adapted to receive via the DVB-T network.

Claim 40 (new): The device of claim 10, wherein the first communication network is a cellular network, and wherein the transceiver is adapted for use with the cellular network.

Claim 41 (new): The device of claim 11, wherein the first communication network is a cellular network, and wherein the transceiver is adapted for use with the cellular network.

Claim 42 (new): The device of claim 10, wherein the communication device is a portable communication device.

Claim 43 (new): The device of claim 11, wherein the communication device is a portable communication device.

Claim 44 (new): A system for accessing information on a computer network using a device as claimed claim 10.

Claim 45 (new): A system for accessing information on a computer network using a device as claimed claim 11.

Claim 46 (new): The system of claim 10, further comprising a database of user profiles for storing a list of information categories determined to be of interest to the users.

Claim 47 (new): The system of claim 11, further comprising a database of user profiles for storing a list of information categories determined to be of interest to the users.
